

Things heat up as Netanyahu indicted, while Trump declares war on The Queen

The battle for the planet Earth has heated up again as mass-murdering Israeli crime minister Benjamin Netanyahu is indicted, while U.S. President Donald Trump declares war on Queen Elizabeth. Economic and information warfare between the U.S. and China is heating up too, especially over Asian gold and the recent American lithium grab in Bolivia. This is part of the ongoing battle for control of the international financial system raging between the Gnostic Illuminati and an alliance of Asian and European royals.

Let us first look at the battle for control of the Anglo-Saxon world that is flaring between Trump and the British Empire. Here Pentagon sources say, "Trump is declaring war on the Queen not just for spying and trying to remove him from power, but also for paedophilia, murder, and other heinous crimes of the royal family." British royal family sources are saying that while traditionally they try to keep a stiff upper lip and stay above the fray, they are seriously thinking of hiring lawyers to sue for libel over recent such allegations against them.

The public battle is centred around Prince Andrew and his connections to pedophile blackmailer Jeffrey Epstein and an alleged affair with a 17-year-old girl. "Pedophile Prince Andrew or "randy Andy" is so toxic he has been or is about to be dumped by British Telecom (BT), Standard Chartered, Barclays, Stelios Philanthropic Foundation, Bosch, Cisco, Aon, Salesforce, TV Azteca, Inmarsat, KPMG, AstraZeneca, Air Asia, Woodside Petroleum, and even Chinese companies like the Bank of China, the China Construction Bank, JD.com, Tencent, and the Li Ka Shing Foundation," the Pentagon sources say.

The Queen has also publicly dismissed Andrew from all official royal activities. A European royal close to the Queen said, "I wouldn't be surprised if the affair seriously damages the Monarchy. The Queen is no longer in supreme control of the Monarchy and Court of Saint James. For insiders it is really very serious now."

The real battle, of course, is over control of the Anglo-Saxon navies, agree Pentagon and MI6 sources.

Here, "the Trump purge began with the firing of Secretary of the Navy Richard Spencer for insubordination, and may be followed by Obama flag officer holdovers, as 'the Donald' has won the loyalty of warfighters and special ops forces needed to take down the Zionists and the deep state," Pentagon sources say.

MI6 sources, for their part, say, "There seems to be a lot of infighting now and attempts to strip the Queen of things like the CIA, U.S. DOD, etc., so this latest fiasco may be an expression of all this."

In a sign of just how serious a battle this is, the Pentagon sources say that "Since Vice-Admiral Andrew won't be extradited and may hide behind diplomatic immunity he may be renditioned by the U.S. military, since the Queen is also Commander in Chief of UK forces." Needless to say, such an operation would be tantamount to a declaration of war.

The battle to control the U.S. and UK navies is also just one aspect of the bigger battle for control of the financial system. Trump is on the warpath against the European and Asian royals because they are about to stage "a simultaneous recalibration of the Forex and sovereign debt markets on a global level," according to the European royal.

Trump is attempting to counter this by going after the \$29 trillion Indonesian gold fraud carried out by the Federal Reserve Board at the time of the Lehman crisis, according to CIA sources in Asia.

According to the CIA, “During the financial crisis, the New York Fed was given unprecedented powers by the Federal Reserve Board of Governors in Washington, D.C. to create over \$29 trillion in electronically engineered money to bail out Wall Street. A significant portion of the \$29 trillion went to prop up many of the central banks around the world.”

In his counterattack, “Trump’s soon-to-be-next move is that the Green Hilton Memorial Agreement signed by [then President] John F. Kennedy and President Sukarno at Geneva in November 1963 becomes a reality. Trump can, with the stroke of his pen by Executive Order, reinstate Executive Order 11110 or an amendment thereof, thus allowing the Department of the Treasury to issue the new United States dollars. This may be the reboot of the U.S. dollar, as Trump leaves the debt of the Federal Reserve to be resolved by the actual owners—the Khazarian Zionist cabal,” the CIA says.

The European royal commented that “If that is the extent of the received intelligence at the CIA, then we have a long way to go with them. Individual nation-states such as America would obviously be prevented from going it alone because of the inherent interdependence in the whole thing. But the plan is to migrate away from fiat to asset-backed [currency]. That part is correct, yes.”

Trump, meanwhile, is also attacking Wall Street, according to the Pentagon sources. “After the failed IPOs of WeWork, Lyft, and Uber, greedy Wall Street is unable to make much money from the pump-and-dump Aramco IPO, as their top dogs like JP Morgan and Goldman Sachs face DOJ criminal enterprise investigations along with Boeing, General Electric, and other corporate miscreants,” the sources say.

Saudi Aramco, of course, is key to the support of the Rockefeller petrodollar. On this front, the Pentagon sources note, “The Canada Pension Plan Investment Board, the Russian oil company Lukoil, and the Malaysian national oil company Petronas all say no to Aramco, leading other pensions like the Japan Pension Investment Fund and state-owned oil companies like Rosneft, PetroChina, Sinopec, Gazprom, Petrobras, and Pertamina to follow.”

Trump has also seized Japan’s \$1.5 trillion national pension fund to keep the U.S. government afloat, according to CIA sources in Asia. That’s why the fund stopped disclosing how it allocated its assets for the fiscal quarter ending in September—that is, at the time the U.S. government needed money to pay its bills.

<https://www.reuters.com/article/us-japan-gpif/japans-gpif-reports-167-billion-second-quarter-profit-gives-fewer-details-while-deciding-new-portfolio-idUSKBN1XB3NY>

“Where is the real money that all the Japanese worked for all these years? When the market crashes, as it is very close to doing, there go all the computer entries. I presume it is nearly the same with all government pension funds. The game is about over,” is how the CIA source explained the situation.

The other thing the Trump forces are doing is physically detaining and killing, or else imprisoning political enemies. That’s why, as far as we can tell, all recent appearances by Barack Obama, George Soros, Nancy Pelosi, Adam Schiff, etc. are computer graphics. It’s getting harder to tell, but for example, if you look at the 1:13 to 1:15 second mark on this video of a recent “TV appearance” by Nancy Pelosi, you can see from her eyes that she is a computer-generated image:

The attacks are going both ways. Trump ally Benjamin Netanyahu was finally indicted on corruption charges last week. Pentagon sources say he is trying to negotiate a plea bargain by threatening to tell the world what he knows about the Fukushima mass-murder attack against Japan.

Also, Trump lawyer and ally Rudolph Giuliani has publicly been saying that he might be killed but that he has “insurance.” Presumably he is talking about what he knows about 9/11, since he was mayor of New York at the time of the attacks.

Then of course there was the attempted poisoning of Trump earlier this month as reported by several alternative news outlets.

What's interesting about this battle between the Gnostic Illuminati and their man Trump versus the world royals is that both seem to support the creation of a meritocratically staffed future planning agency.

Russian President Vladimir Putin publicly came out last week and said the future-planning-agency-based system pioneered by Japan and Singapore and which is now used by China is superior.

"The aggregate performance of the Chinese economy is a lot more efficient than that of other major economies, including the American one," Putin told the VTB Capital Investment Forum 'RUSSIA CALLING!' on Wednesday.

"I think that to a major extent, this causes the concern of our U.S. friends and explains the restrictions imposed on China," Putin said, adding that the U.S. sanctions were a result of 'this fact, not of the disparity in the trade balance.' The key to Chinese success, according to Putin, was a 'unique symbiosis between the centralized planning and the market economy.'"

The White Dragon Society has long promoted the establishment of a world future planning agency emulating—and improving upon—the Asian central planning/market hybrid model that Putin is praising. If such an agency were set up with an annual budget of \$1 trillion or more, it could end poverty and stop environmental destruction within a matter of months. After that, it could consult with the people of the world about how to turn this planet into the paradise it is meant to be. The agency could also oversee a swords-to-plowshares transition of the military-industrial complex. Following this, it could carry out an expansion of human and Earth life into the universe.

Instead of running the planet on the current Western system of perpetual conflict, we can start making love, not war. Remember, the battle of evolution isn't won by the lion that is fighting and risking injury or death—it is won by the lion that is back in its cave making love.
