

# The Matrix

It is quite frightening to find that the many Intelligence Agencies in the world think that this is a Matrix.

This will of course disconnect them from responsibility for any of their actions & their obsession with repressing & controlling the human domain.

If it is not real, they are doing nothing wrong.

But historically humanity has been ruled by Psychopaths.

These appear now to be Criminal Paranoid (OCD) Psychopaths, with massive armies & covert mercenaries & administrations under their control.

As you have said before, it only takes a few at the pinnacle of the Hierarchy to rule.

But their obsessive compulsive behaviour also exposes their weaknesses.

A psychopath has a brain which lacks many human traits. They cannot think on their feet & evolve ideas in a creative way, therefore they have to steal their ideas from other people's books. Their ability to poison all the opposition may help them steal the copyright of all human creations but it does not help them create new technology themselves.

In fact they probably only understand technology as a tool for power & control.

The Internet Of (dead) Things.

The Matrix Solution for the Unintelligent Agencies also shows that they have no religious belief or conscience as they drift down the road to Satanic rituals, child rape, mass murder & their plan to cut down the world population to 10%.

They could have stopped all of the Wars & Fraud. But they took the money instead.

FOR THE GREATER GOOD: The justification for a life of crime, mass murder, war, fraud, paedophilia & greed.
