

## The Bankers

If proof were needed that the bankers control western governments it came last week when the US Treasury re-imposed sanctions on Iran just 24 hours after Obama had lifted them.

Obama spent over a year trying to resolve the contentious issues surrounding Iran's nuclear enrichment program which had Israel & US hawks continually demanding military action to "solve" the issue.

The US treasury, over run with manipulators from The Fed, seems to have become its own director of foreign policy. The Federal Bank which controls the US & the World Economy through its direction & placement of the money supply is a private corporation run by criminal zealots.

(I use the word criminal with regard to Natural Law as obviously they change any laws which criminalises their actions.)

The power of these bankers is so great that apart from running wars & the World Economy they direct money to destroy sovereign nations & direct The Pentagon, the CIA & mercenaries to redraw the maps of the Middle East & Europe.

This has brought them & the western nations into direct conflict with China & Russia already raising the stakes to a nuclear standoff.

All this information is neatly concealed by the western Main Stream Media which they also control.

Another failing in this hierarchy of economic power is their current intension to impoverish the western civilian societies of UK/US/EU & return us to the days of feudal lords & slaves.

Their insane paranoia & jealousy has led them to despise other people's happiness & shared community spirit.

The bankers cartel also have control of the world's oil & energy companies which apart from destroying countries & fighting wars, have held back humanities natural evolution.

There have been times in the past & present when clean & cheap energy sources have been developed. But they have stepped in to buy & destroy them.

They are also currently involved in destroying Bitcoin, the revolutionary digital currency which logs transactions & is therefore fraud proof, something they do not want.

So the Western economies are trapped in a retrograde ideology as the rest of the world tries to move into the future & we are left in our "leaders" dollar led economic fraud hierarchy.

A hierarchy that wants to go backwards to the good old days of feudal fascism, Satanism & endless Global war.
